

Malvern Manifest System

The Ultimate Shipping System for the New Millennium

The *Malvern Manifest System* is a PC-based, multi-carrier shipping system that will greatly enhance your operation's productivity while substantially reducing overall shipping costs.

Immediate & Tangible Operational Benefits

Proven

Since the 1980s, the *Malvern Manifest System* has been the workhorse engine for a number of successfully branded shipping systems. Feedback from thousands of users has contributed to this flexible, efficient, easy-to-use, and cost-effective line of shipment automation solutions. Your modest investment in *Malvern* will pay dividends well into the future.

Versatile

Whether your shipping process requires input from just a single customer database or calls for the exchange of data between multiple applications, the *Malvern Manifest System* can be integrated into virtually any host system, database, and platform. The flagship *Malvern Manifest System* is the only system you will ever need.

Scalable

Whether your daily shipping process involves a few parcels with a single carrier or several truckloads using all major carriers, the Multiple Station Network option enables the *Malvern Manifest System* to process an unlimited number of transactions in a single shipping period. The *Malvern Manifest System* is intended to grow along with your operation.

Embedded

For companies that wish to incorporate carrier-compliant shipping functionality into their own applications, the Malvern Site Server is a comprehensive, behind-the-scenes, multi-carrier shipping engine. As the demands of your shipping operation grow, the Malvern Site Server eliminates the burden of maintaining frequent carrier rate and methodology changes and allows you to focus on your core business functions.

Economical

The *Malvern Manifest System* offers several cost-saving features that include small parcel and LTL rate shopping, Proof-of-Delivery reporting, third-party parcel insurance, shipment optimization, hands-free operation, and an overall reduction in paperwork. If there is a way to save shipping costs, the *Malvern Manifest System* will automate it for you.

Competitive

The *Malvern Manifest System* was once selected as the product best positioned to replace the recently obsolete line of APSS shipping solutions provided by Kewill. Selecting a market leader like *Malvern*, translates into superior solutions at affordable prices.

At-a-glance Features, Options, and Attributes
