

Malvern Manifest System

Multi-Carrier Shipping Software optimized for ScriptMed

Malvern Systems, Inc

Company Description:

Malvern Systems develops affordable, multi-carrier shipping software designed to streamline shipping operations and to reduce costs. With the ability to economically accommodate unique customer requirements and challenges, Malvern's typical return on investment is extremely rapid.

Integration Description:

The Malvern Manifest System is a PC based shipping system that seamlessly integrates (import and export) with ScriptMed including package tracking data.

Carriers Supported:

US Postal, UPS, FedEx, DHL, UPS Mail Innovations, FedEx SmartPost, DHL Global Mail, Spee-Dee Delivery, OnTrac, LTL (less than truck-load), custom carriers and more.

Available Features:

Automatic Rate Shopping, HTML Email Notification, Address Correction, Batch Processing, Automatic Package Tracking, Multiple Networked Stations, and much more.

Other applications or platforms supported:

Malvern uses a sophisticated, open source vbScript engine for integration. Interface technologies include ODBC, XML, TCP/IP, text files and much more. Integrates with dozens of popular packages as well as supporting custom integration to virtually any open host system, database, or file(s).

Pricing Options (through December 31, 2009):

Purchase

from \$4,995
